PROFESSIONAL SUMMARY

I am ambitious and have a genuine enjoyment of coding and problem-solving. I have knowledgeable experience with program development, customer service, and team leadership/management. Additionally, I continue to develop my skills to further benefit me and future projects I get the opportunity to work on. I want to help improve any team or company I get a chance to work with.

SKILLS	C#	SQL	HTML	Front-End
	Java	Database Design	CSS	Web Design
	C++	JavaScript	Photoshop	

PROJECTS

- **BOCES:** I created a windows form application that involved a front-end design that was simple and easy to use for both the regular users and admin. The regular users were individuals with disabilities that varying skill and mental capacity. The admin side needed to be a streamlined way to manage users, tasks, and reports. I used C# for the code functionality and Microsoft SQL Server to create a database to manage all the info.
- **Clarion University Rec Center:** I worked in a team of 4 people, we had to design and implement a replacement for their excel program. We created a C# program with SQL Server to keep track of membership purchases, passes, and other daily logs. We also streamlined their previous workflow and allowing their data to be stored on the machine longer and get exported easier with more readability.
- **Personal Website:** With my prior experience I have spent time working on my own website.

PROFESSIONAL EXPERIENCE

Web Director

Clarion Student Association

- Manage front end WordPress of the website in addition to back end MySQL and PhpMyAdmin

Theater Manager

Clarion Student Association

- Operate campus movie theater including handling money for registers, taking care of customers, creating an employee schedule, and managing employees

Team Member

Kirklands
